Catering Captain

PROJECTS

My PinBoard (Rails, React, Flux) [live | github](#)
A social site where users pin text or images on a collaborated 'bulletin' board with a team, or your own private board

- Uses BCrypt to secure accounts with both front-end and back-end validations
- Makes AJAX requests to fill stores, allowing React to more quickly refresh components

RogueCanvas (JavaScript) [live | github](#)
A dungeon crawling turn based game on HTML Canvas

- Each level randomly generates using cellular automation
- Using a flood fill from the starting location, maps are remade if the explorable space is too small

Embody (JavaScript) [live | github](#)
Chrome extension for healthy break reminders and meditation

- Sends notifications to either the desktop or the active webpage tab
- Uses setInterval and setTimeout to act as a timer

EXPERIENCE

- Performed website updates and redesigns
- Conferred with business owner to develop and prioritize needs and content criteria
- Identified CSS and program language bugs and corrected problems
- Excelled within deadlines and ensured accurate and on-time completion of all tasks and projects
- Supervised lower level staff on projects to ensure adherence to schedule and scope
- Assigned duties and responsibilities to project staff
- Trained and supervised new staff on work procedures
- Collaborated with management or users to develop e-commerce strategies and to integrate these strategies with Web sites

EDUCATION

App Academy
Full-stack software development course

2016

Washington State University
B.A. Business Administration (Finance)

2006 - 2010
